

Kalshi Research Partners with ProCap Financial to Bring Prediction Market Data to Investment Research

April 21, 2026

- Partnership creates a new category of institutional-grade investment research focused on real-time prediction market data
- First time Kalshi provides its data to a financial research provider with paying subscribers

NEW YORK--(BUSINESS WIRE)--Apr. 21, 2026-- [ProCap Financial](#) (Nasdaq: BRR) (the “Company”), today announced a partnership with the research arm of [Kalshi](#), the world’s largest prediction market, to create a new category of investment research focused entirely on real-time prediction market data. This is the first time Kalshi has provided its data to a financial research provider with paying subscribers.

The new prediction market research product will be available through ProCap Financial’s research offering, [ProCap Insights](#), which deploys AI agents to analyze mountains of data, pressure test conclusions through agentic debate, and agentially write research reports. ProCap Insights will create reports on individual prediction markets, various platform trends, data-driven investment strategies, mispriced market contracts, and Kalshi-specific data reports.

Prediction markets work like the stock market, but for real-world outcomes. With Kalshi’s markets and data, investors can get direct exposure instead of indirect proxies like a company’s stock performance. Together, ProCap Insights and Kalshi data equip investors with real-time intelligence on the events shaping the markets, including economic releases, global elections, geopolitical shifts, and other catalysts shaping what comes next.

“Kalshi Research’s prediction market data paired with our AI agents is a powerful combination,” said **Anthony Pompliano, Chairman and CEO of ProCap Financial**. “Independent investors have never had access to a research engine like this. By combining real-time market signals with AI-driven analysis, we’ll deliver sharper insights to help investors make smarter decisions in the growing industry of prediction markets. Our goal has always been to help independent investors make money, and this partnership brings us one step closer to delivering on that.”

Kalshi’s crowdsourced, real-time probability data has demonstrated strong performance, with its prediction markets outperforming Wall Street consensus by 40% across time periods and market conditions and matching or exceeding forecasts on 85% of inflation prints one week in advance, according to a [study performed by Kalshi Research](#).

“Prediction markets turn uncertainty about real-world events into actionable signals,” said **Tarek Mansour, co-founder and CEO of Kalshi**. “We’re partnering with ProCap Financial to bring wisdom-of-the-crowds intelligence directly to financial research, so both retail and institutional investors can benefit from this data and analysis.”
